Brief introduction:

WR-HS03 is a new developed kind of sprayer which has unique fan and stream output options let you rinse or water large areas with ease. So it makes ideal for applications in the lawn and garden, home and outdoor cleaning. It is available in a range of mix-ratio options to suit your particular needs.

Standard ratio is fixed as 5(water):1(concentrate), if customers need different ones, it can be customized like: 5:1, 12:1, 30:1, 50:1, 80:1

New Hose End Sprayer

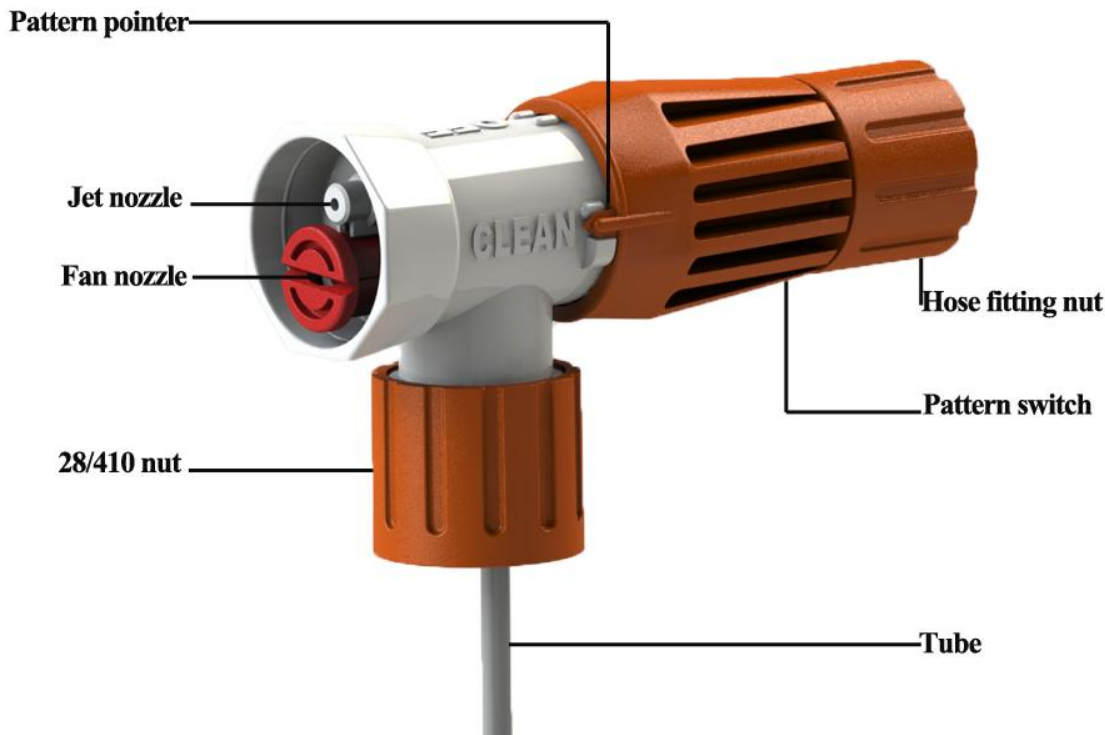

Neck size: 28/410

Ratio: 1:5 / 1:12 / 1:15 or customized

Feature:

1. Heavy-duty material and new structure
2. Provides FAN, JET spray patterns for different purposes.
- 3 Range: 5-12M
4. Can be used on a variety application, garden and lawn care like weed killer, pest control... ; home cleaning like wood, paint, brick, paving and roof materials.

Product details:

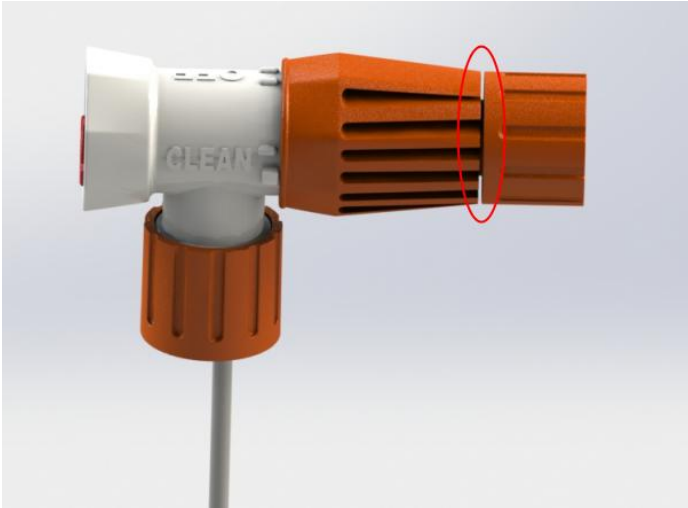

1. Pattern pointer: when rotate the switch, pointer would be referred different patterns.
2. Fan nozzle: the part to generate chemicals.
3. Jet nozzle: the part to generate water, it's powerful.
4. Bottle nut: 28/410 Connected with bottle neck.
5. Hose fitting nut: Connected with garden hose directly. (American standard 3/4"); we also offer the nipple to connect Europe garden hose.
6. Pattern switch: these two assembling parts mean built-in dilution settings: pressure caused by the water goes through mixing head will suck the chemical up, it is the key theory that makes the mixing happen. Three modes to choose: Clean (mixing liquid), off and rinse (water).
7. Dip tube: It is made of PVC, function is to suck the chemical from bottle.

Product Advantages: Humanized design in structure

1. Pattern switch is behind which makes no touch in chemicals when operating.

2. Hose fitting nut is separate with the pattern switch, it would not be rotatable when switch rotates.

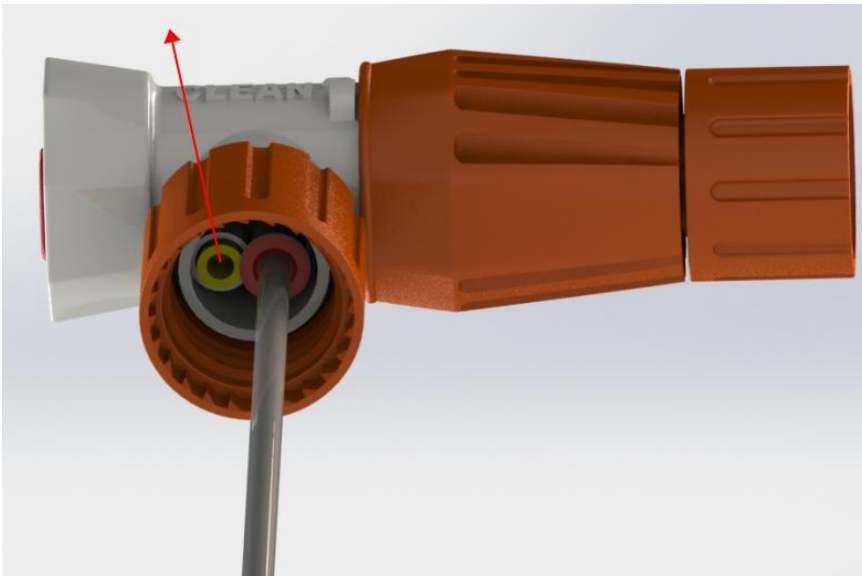

3. Pattern switch is much easy to smooth.

4. Venting is available

-- the breathing film is available which lead to off gas to avoid bloating

Multiple application

It is a Full purpose hose end cleaning tool for not only garden and lawn care, like pest control, weed killer, insecticide or fertilization. But also for home and outdoor cleaning, like roof, houses, windows, cars, tyres, and more! The fan-shaped spray pattern can increase the chemical coverage area. The powerful jet spray pattern can spray longer distance and reaches up to 27' high with 80 PSI of home water pressure.
